SPILLERS™ – YOUR PARTNERS IN CARE™.

Date

Your horse's name

Your horse's weight

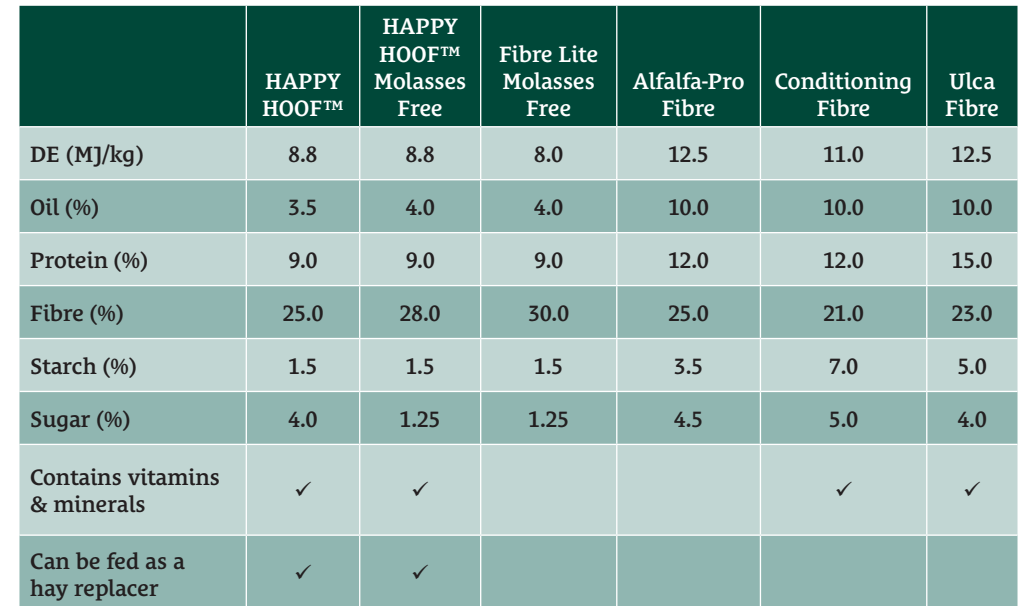

Your horse's body condition score

1 Poor ☐ 2 Very thin ☐ 3 Thin ☐ 4 Moderately thin ☐ 5 Moderate ☐

6 Moderate to fleshy ☐ 7 Fleshy ☐ 8 Fat ☐ 9 Extremely fat ☐

Our versatile range of short-chopped fibres includes fibres that complement traditional compound feeds, provide the whole bucket feed and ones that can be used to completely replace hay.

SPILLERS™ Balancers

A balanced diet is key to good health, but as many horses and ponies don't need the recommended amount of traditional compound feed their diet can often be lacking in key nutrients.

SPILLERS™ Balancer range has the answer. It provides concentrated nutrition without unwanted calories to balance a forage based diet and can make up for the shortfall in nutrients if you are feeding less than the recommended amount of compound feed.

	Daily Balancer	Ulca Balancer	Supple & Senior Balancer	Lite & Lean Balancer	Original Balancer	Gro N' Win™ Balancer

SPILLERS™ Low Energy & Conditioning Feeds

SPILLERS™ essentials range of low energy feeds are ideal for horses and ponies with low to medium energy requirements.

Our Conditioning feeds offer calories from a balance of oil, high digestible fibre and controlled levels of starch to maximise condition without excitable behaviour. The range contains quality protein to provide the building blocks for excellent muscle tone and topline. Ideal to be fed alongside SPILLERS™ Conditioning Fibre to add that extra shine from within.

	High Fibre Cubes	Horse and Pony Cubes	Cool Mix™	Speedy-Mash Fibre	Digest+ Conditioning Cubes	Shine+ Conditioning Mix

Can be fed as a hay replacer	✓			✓		

All SPILLERS™ Feeds are BETA® NOPS approved.

SPILLERS™ Senior Feeds

As horses age they sometimes need a little more care; some maintain their weight well on forage alone requiring a balancer, others lose weight and require a conditioning feed, some struggle with their teeth requiring a mash, whilst others thrive on their normal feed.

This is why SPILLERS™ have designed a flexible range of senior friendly feeds to ensure your horse is completely cared for, and for extra reassurance our range is the first to be veterinary approved.

	Senior Super-Mash	Senior Conditioning Mix	Senior Complete Care Mix	Supple & Senior Balancer

SPILLERS™ Performance & Stud Feeds

Fuel their potential with the SPILLERS™ Performance range. Regardless of your chosen discipline, we've got feeds to optimise their condition, give them controlled energy and help them keep hydrated and recover post-exercise.

SPILLERS™ Stud feeds cover the full breeding cycle. Each feed is meticulously formulated to include quality protein and a balance of energy sources to support safe even growth, with additional nutrients to support immune and digestive health.

 All SPILLERS™ Feeds are BETA® NOPS approved.

SPILLERS™ Feeding Guide

- ◆ Ideally provide as much forage as the horse/pony will eat while being mindful of excess waste. If weight gain is a concern, do not restrict total forage intake to less than 15g/kg bodyweight/day (dry matter, see table below).
- ◆ Feed approximately 20-50% more haylage than hay by weight to account for the higher moisture content.
- ◆ Weigh all feeds at least once to ensure you are feeding the correct amounts.
- ◆ Balancers are ideal for horses and ponies able to maintain weight easily on forage alone or less than the recommended ration of compound feed.
- ◆ Ideally add chopped fibre to meals to help extend eating time.
- ◆ Feed no more than 2kg per meal (dry weight) for horses, less for ponies.
- ◆ Make all changes to feed and forage gradually.
- ◆ Provide access to a salt lick for horses and ponies at rest or in light work. For all others contact the Care-Line for more advice.
- ◆ Contact the SPILLERS™ Care-Line if your horse/ pony is prone to any clinical conditions such as laminitis, colic, tying up and gastric ulcers.

Feeding Rates

The following table can be used as a guide to calculating the amount of compound feed or balancer required to provide a balanced diet for horses and ponies at rest or in light work. If feeding a balancer in addition to compound feed, reduce the amount of balancer accordingly.

Height		Approximate weight (kg)	Minimum forage including grazing (kg/ day dry matter)	Compound feed (kg/day)	Balancer* (g/day)
(hh)	(cm)				
12.2	128	200 – 250	3 – 4	1 – 1.5	200
13.2	138	300 – 350	4.5 – 5	2 – 2.5	300
14.2	148	400 – 450	6 – 7	2.5 – 3	400
15.2	158	500 – 550	7.5 – 8	3 – 3.5	500
16.2	168	600 – 650	9 – 10	3.5 – 4	600

*Excludes SPILLERS™ Gro N’ Win™ Balancer.

As a guide

- ◆ 1 Stubbs scoop holds approximately 1.5kg of mix, 2kg of cubes and 500-600g of SPILLERS™ Fibre.
- ◆ 1 SPILLERS™ balancer cup holds approximately 250g of balancer.
- ◆ 1 section of hay from a small rectangular bale weighs approximately 2kg.

SPILLERS™ Gro N’ Win™ Balancer
